COLLEGE OF DENTISTRY

COMPLETE DENTURE SIMULATION EXERCISE

____ Semestral Exercise Activity
____ Board type

CLINICIAN'S CODE: _____ DATE: _____

PROCEDURE	%	C.I. Signature, Remarks & date
1. Diagnostic casts • Block out of cast as necessary – **4%** • Denture base (blue) outline clearly defined- **3 %** • Tray outline (red) is clearly defined- **3 %** • **Overall Neatness**	10	
2. Individual trays: Shellac Base plate self-cure tray resin or VLC resin (blue or white) - **Close fit tray** (no spacer is required; the tray should be perforated) • Adequate relief provided on relief areas such as frenii, incisive papilla, midpalatine raphe, others – **2%** • Extensions- should cover all the necessary anatomic landmarks; 2 mm short on the vestibule area; apron should be present on the maxilla – **3%** • Form, extend and location of Handle. - **5%** **Other criteria to consider:** • Uniform thickness of the tray • Trays are smooth all throughout • Proper manipulation and curing of the material. • **Overall neatness**	10	
3. Master casts (Use pencil to draw) • Placement of guiding lines that will evaluate arch forms and in setting the artificial teeth. – **6%** • Denture base outline clearly defined- **6%** • PPS and Post dam outline are clearly defined (post dam shaded)- **3 %** • **Overall Neatness**	15	

4. Trail denture base and Occlusion rims -shellac base plate, high heat pink wax, SC resin (pink), VLC resin (pink) LC handheld and non-dental curing machines i.e., nail polish UV lamp are not allowed • Fit of trail denture bases- **15%** • Positioning of the occlusion rims (can be reflective in the setting of teeth) – **10%** • **Overall neatness**	25	
5. Mounting of master cast • Maxillomandibular relationship (Vertical, Horizontal and Centric)- **10%** o Occlusal plane parallel to articulator marks o Correct Bennet and Condylar angle • Proper mounting/ Incisal pin position- **5%** o Screws secured • **Overall Neatness**	15	
6. Setting of the Artificial Teeth - Proper selection of Artificial teeth – **5%** PROPER SETTING OF ARTIFICIAL TEETH ANTERIOR • Overjet - **1%** • Overbite - **1%** • Overall harmony- **5%** POSTERIOR • Compensating curve- **2 %** • Neutral zone – **3%** • Cusp to fossa relationship- **3%**	20	
Gingival wax-up and Festooning - **5%** **Overall Neatness**		

Total points Earned (75 POINTS TO PASS)	/100
